

Application No.: 09/782,745

Docket No.: LUD 5531.1 DIV (10101429)

AMENDMENTS TO THE SPECIFICATION

Page 6, lines 3-6:

--Figures 4A-4B present an alignment of the cDNAs of the six GAGE genes discussed herein. In the figure, identical regions are surrounded by boxes. Translation initiation sites and stop codons are also indicated. Primers, used in polymerase chain reaction as described in the examples are indicated by arrows.--
